

Maximize the power of SharePoint with Yammer and turn business collaboration into a social, mobile, and engaging experience. Whether it's on premise or in the cloud, Yammer deeply integrates with SharePoint to add a real-time social layer to core SharePoint capabilities. Engage in team and company-wide conversations, collaborate around files and projects, and become more productive by using SharePoint and Yammer together. And when you're on the go, stay connected to conversations happening inside SharePoint with Yammer mobile applications.

FEATURES

Primary Yammer Web Part

- » Embed virtually any Yammer feed (including My Feed and Group Feeds) into SharePoint sites to facilitate team and company-wide conversations.
- » Send private messages directly to one or more coworkers at a time and keep track of these conversations in a separate Private Messages tab.
- » Manage new messages, @mentions, replies and more in a separate Notifications tab.

Single Sign-On

Leverage SharePoint authentication credentials to simultaneously log into Yammer through a single entry point.

Admin Configurations

Manage the Primary Yammer Web Part using SharePoint's built-in Web Part controls and templates. Choose to configure read-only Yammer feeds so that users without Yammer accounts can also view conversations.

Notifications

Track unread Yammer messages directly in SharePoint.

Yammer Web Part for SharePoint Online **NEW** ★

Embed Yammer feeds using a web part specifically built for SharePoint Online pages for maximum compatibility in the cloud.

Light Embeddable Feeds

Embed a lightweight Yammer mini feed anywhere in SharePoint to view and keep track of relevant discussions without disrupting your workflow. Click-back to the Primary Yammer Web Part to get involved in the conversation.

Document & List Item Integration

Send links to documents, announcements, and tasks from SharePoint to Yammer feeds for real-time collaboration.

Federated Search

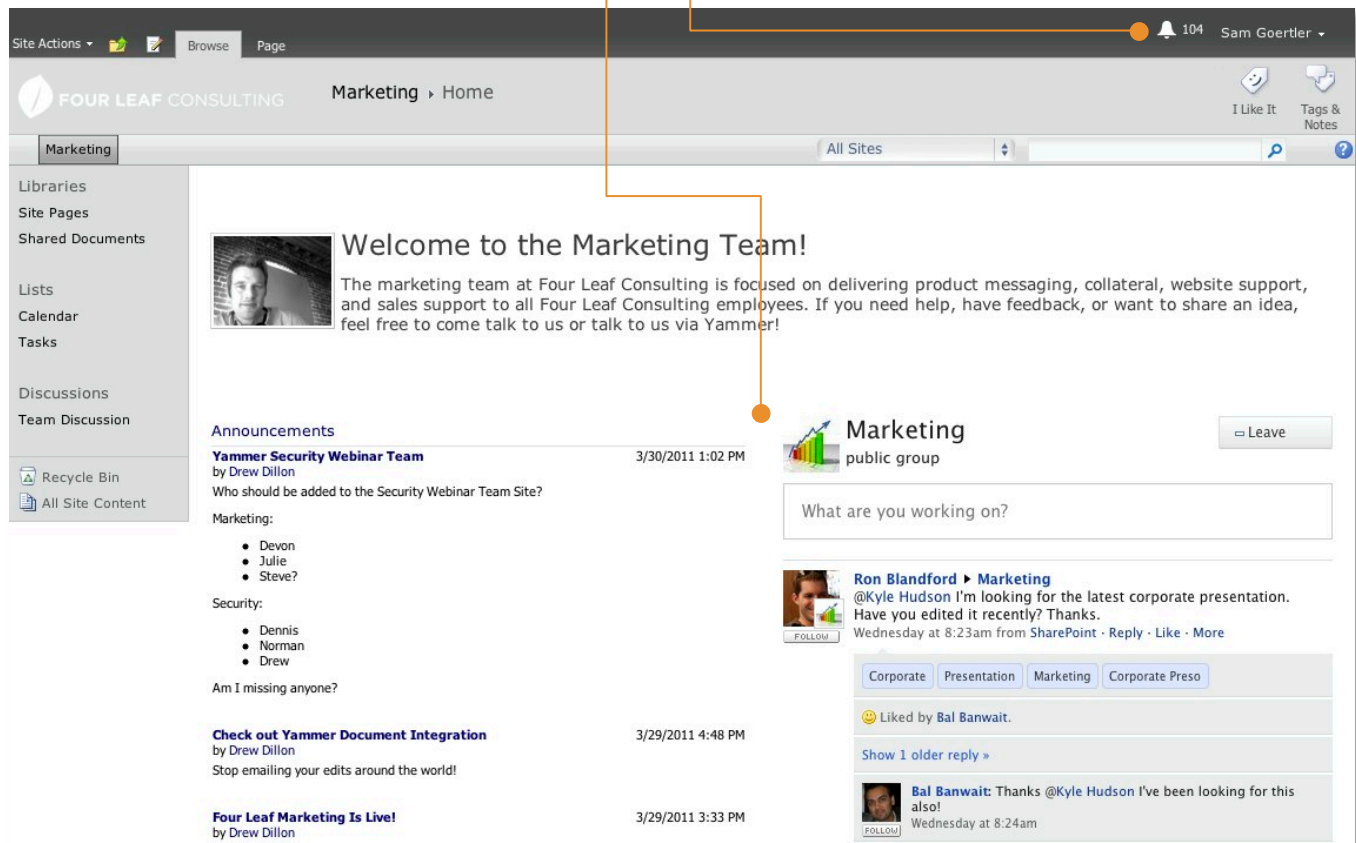

Find the information you need fast with relevant Yammer messages displayed side by your SharePoint search results.

Activity Streams

Automatically share activity happening in SharePoint with your colleagues on Yammer.

Configure a Yammer Web Part on any SharePoint site.

Track unread Yammer notifications directly in SharePoint.
